DETAILED ACTION

Specification

- 1. The abstract of the disclosure is objected to because it contains more than 150 words.

 Correction is required. See MPEP § 608.01(b).
- 2. The disclosure is objected to because of the following informalities:
 - a. On page 11, paragraph [0035] and page 14, paragraph [0044] please provide updated information of U.S. Application Serial No. 10/077,499, such as -- U.S. Patent No. 6,899,681 --;
 - b. On page 23, paragraph [0065] please provide updated information of U.S. Application Serial No. 10/136,935 such as -- U.S. Patent No. 6,632,177 --. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3737

- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 5. Claims 1-3, 6-9, 12, 15-19, 22-25, and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angelsen (US 6,461,303 B2).

Angelsen teaches in col. 4, line 54 - col. 5, line 5, a method and system for ultrasound contrast agent imaging comprising the steps and structures for setting a transmit level and arranging/altering/adjusting/setting transmit pulse parameters so that the incident pressure pulse that is utilized for imaging of the contrast agent for a particular depth would have minimal variation over the actual image range. Angelsen further teaches a control (305), a processor (311), and a memory (701). Angelsen further teaches that the imaging parameter is selected at from at least one of the group of: transmit modulation frequency, transmit bandwidth, transmit coding, number of transmit foci per scan line, number of transmit pulses per scan line, number of transmitted lines per image, time between transmissions, velocity scale, reverberation-suppression pulses, receive bandwidth, receive demodulation frequency, transmit coding, reverberation-suppression pulses, size of scan region and combinations thereof. Angelsen fails to teach specifically that the parameters are being arranged/altered/adjusted/set automatically. It would have been obvious to an ordinary skill in the art, at the time the invention was made to

Art Unit: 3737

automate such parameter selection since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. In re Venner, 120 USPQ 192.

Allowable Subject Matter

Claims 4, 5, 10, 11, 13, 14, 20, 21, 26, 27, and 31 are objected to as being dependent 6. upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (please see attached "Notice of References Cited").

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ali Imam whose telephone number is 571-272-4737. The examiner can normally be reached on Mon. - Th., 8:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
